SUMMARY

- Cybersecurity-focused IT professional experience in endpoint diagnostics, system security, and risk assessment. Skilled in vulnerability analysis, incident response planning, and hardware/software remediation. Adept at enforcing strict data privacy standards and translating complex technical concepts for diverse users, leveraged from over 5 years of professional customer service and sales experience.

WORK EXPERIENCE

Mr. Phix LLC

May 2026 – Current

End Device Repair Technician – Full-Time

Wilmington, NC

- Log, triage, and track inbound service requests across iOS, Android, macOS, and Windows platforms via RepairDesk, ensuring accurate documentation from intake through resolution.
- Enforce strict data privacy and chain-of-custody protocols during device repairs, data migrations, and endpoint remediations to safeguard sensitive customer information.
- Utilize iMazing for secure data backups, and deploy Malwarebytes and Hitman Pro for real-time threat detection, malware removal, and endpoint security.
- Restore, update, and configure systems, verifying all devices meet current OS baselines and security patch requirements prior to customer deployment.
- Analyze complex system failures and efficiently escalate critical security and technical incidents to ensure timely and accurate resolution.

Dick's Sporting Goods

Aug. 2024 – Current

Golf Sales Associate – Part-Time

Wilmington, NC

- Leverage data-driven insights and product analytics to provide tailored, high-performance equipment recommendations, consistently contributing to departmental performance targets.
- Cultivate strong client relationships by translating complex, technical product specifications and metrics into easily understandable concepts for a diverse customer base.

PROJECTS

FBI IC3 System | NIST Risk Assessment Group Project

- Conducted a comprehensive risk assessment of the FBI Internet Crime Complaint Center (IC3) system, evaluating compliance against FISMA and NIST SP 800-53 frameworks.
- Developed strategic assessment plans encompassing continuous monitoring, incident response, and risk mitigation to safeguard sensitive federal data.
- Analyzed 39 system vulnerabilities across varying severity levels to formulate a formal Authorization to Operate (ATO) recommendation based on calculated risk tolerance.

Seaview Crab Company | Customer Relations Group Project Capstone

- Acted as a technical consultant to evaluate fragmented point-of-sale (POS) systems and deliver system consolidation recommendations to enhance operational workflow.
- Engineered data cleansing strategies to centralize customer information, significantly improving data integrity and client engagement capabilities.

EDUCATION

University of North Carolina - Wilmington

Aug. 2023 – May 2026

Bachelor of Science in Information Technology - Cybersecurity Concentration

Wilmington, NC

- **Coursework:** Systems Network Administration, Relational Databases (SQL), SDLC, Cyber Risk Management, Network Defense, and Ethical Hacking.
- **GPA:** Cumulative: 3.08 | Major/Concentration: 3.46
