## SUMMARY

- Cybersecurity-focused IT professional with experience in endpoint diagnostics, vulnerability analysis, incident response, and hardware/software remediation. Skilled in enforcing strict data privacy standards and translating complex technical concepts for diverse, non-technical audiences. 5+ years of customer service and sales experience.

## WORK EXPERIENCE

### Mr. Phix LLC

May 2026 – Current

#### End Device Repair Technician – Full-Time

Wilmington, NC

- Log, triage, and track service requests across iOS, Android, macOS, and Windows via RepairDesk.
- Enforce strict data privacy and chain-of-custody protocols during repairs, data migrations, and endpoint remediations.
- Deploy Malwarebytes and Hitman Pro for threat detection and malware removal; iMazing for secure backups.
- Restore and configure systems to meet OS baseline and security patch requirements, escalating critical incidents.
- Diagnose and repair hardware across iPhone, Windows, and MacBook devices, including battery and screen replacements, SSD upgrades, and drive cloning to preserve customer data.

### Dick's Sporting Goods

Aug. 2024 – Current

#### Golf Sales Associate – Part-Time

Wilmington, NC

- Provide tailored equipment recommendations using product analytics, contributing to departmental sales targets.
- Manage inventory and restock merchandise, focusing on units per transaction (UPT) to drive upselling.
- Perform golf club grip replacements for customers.

### Independent PC Repair & Technical Support

May 2019 – Dec. 2022

#### Freelance Technician – Part-Time

Jefferson, NC

- Delivered hardware, software, and phone-based technical support to a recurring base of local clients.
- Performed OS installations/reinstalls, driver installation, BIOS updates, and malware removal.
- Diagnosed application crashes and blue screens using Windows Event Viewer.
- Performed hardware repair and maintenance, including HDD, motherboard, and CPU replacements
- Advised on and assisted with custom PC builds, including part compatibility and assembly.

## PROJECTS

### FBI IC3 System | NIST Risk Assessment Group Project

Sep. 2024 – Dec. 2024

- Assessed the FBI Internet Crime Complaint Center (IC3) system for compliance against FISMA and NIST SP 800-53.
- Developed assessment plans for continuous monitoring, incident response, and risk mitigation.
- Analyzed 39 system vulnerabilities to formulate a formal Authorization to Operate (ATO) recommendation.

### Seaview Crab Company | Customer Relations Group Project Capstone

Jan. 2026 – May. 2026

- Evaluated fragmented point-of-sale (POS) systems and delivered consolidation and data cleansing plans.
- Collaborated with a project team to define requirements for a prototype CRM concept, enabling centralized client data management and automated email/SMS marketing campaigns for weekly promotions.

## EDUCATION
